

Costa prescription sunglasses come in a variety of lens options, all laser engraved with the Costa "C" so you know you're getting the real deal. Talk to your eye care professional to find the best Costa lenses for you.

THE COSTA 580® DIFFERENCE

With Costa 580 lenses, objects appear more defined because this multipatented lens technology filters out harsh yellow and harmful blue light while bringing brightness and clarity to reds, blues and greens.

COSTA RX LENS OPTIONS

COSTA 580P Rx LENSES: These lightweight, impact-resistant polycarbonate or Trivex lenses feature our proprietary C-WALL® technology – a molecular bond that combines a smudge-free barrier with scratch resistance. An anti-reflective coating on the back of all 580P Rx lenses works to sharpen images by reducing reflections and glare. Costa 580P Rx lenses are available with Waypoint™ digital technology in bifocal, single vision and progressive.

COSTA 580G Rx LENSES: For those who prefer glass, the 580G Rx lens offers the highest clarity you can get in a glass lens and is available in single vision and Waypoint™ C-SCAPE™ progressive technology that was designed with sport fishermen in mind. Our glass mirrored lenses have an encapsulated mirror, which means no more scratches.

RIMLESS RX

Costa offers lightweight, rimless frame options for 580P Rx lenses in an array of colors. State-of-the-art nylon bushings connect the lens and frame and will not come loose over time like traditional bushings.

COSTA PROGRESSIVE LENSES

Costa has two progressive lens designs to choose from:

- Costa C-SCAPE™ design was developed with top sport-fishing pros and lens designers for immediate adaptation, enhanced viewing fields and minimal peripheral blurring.
- Varilux® Stylistic™ design is available in Costa wrap frames for those patients with greater demand for a wider near field of vision in authentic Costa-branded sunwear.

POLARIZED LENS COLOR OPTIONS

580G (Glass) Prescription (+3.00 to -3.00)
