

Costa prescription sunglasses come in a variety of lens options, all laser engraved with the Costa "C" so you know you're getting the real deal. Talk to your eye care professional to find the best Costa lenses for you.

COSTA RX LENS OPTIONS

COSTA 580P Rx LENSES:

These lightweight, impact-resistant polycarbonate or Trivex lenses feature our proprietary C-WALL[®] technology – a molecular bond that combines a smudge-free barrier with scratch resistance. An anti-reflective coating on the back of all 580P Rx lenses works to sharpen images by reducing reflections and glare. Costa 580P Rx lenses are available with Waypoint[™] digital technology in bifocal, single vision and progressive.

COSTA 580G Rx LENSES:

For those who prefer glass, the 580G Rx lens offers the highest clarity you can get in a glass lens and is available in single vision and Waypoint[™] C-SCAPE[™] progressive technology that was designed with sport fishermen in mind. Our glass mirrored lenses have an encapsulated mirror, which means no more scratches.

COSTA 400P Rx LENSES:

These lenses put Costa on the map with exceptional clarity and definition. They are made with lightweight polycarbonate lenses and our proprietary C-WALL[®] technology, which is a molecular bond for superior impact, dirt, oil and scratch resistance. All 400P Rx lenses come with our anti-reflective coating and are available with Waypoint[™] digital technology in bifocal, single vision and progressive.

RIMLESS RX

Costa offers lightweight, rimless frame options for 580P Rx lenses in an array of colors. State-of-the-art nylon bushings connect the lens and frame and will not come loose over time like traditional bushings.

THE COSTA 580[®] DIFFERENCE

With Costa 580 lenses, objects appear more defined because this multipatented lens technology filters out harsh yellow and harmful blue light while bringing brightness and clarity to reds, blues and greens.

STANDARD SUN LENSES

ENHANCED RED AND BLUE COLORS WITH COSTA 580 LENS

COSTA PROGRESSIVE LENSES

Costa has two progressive lens designs to choose from:

- Costa C-SCAPE[™] design was developed with top sport-fishing pros and lens designers for immediate adaptation, enhanced viewing fields and minimal peripheral blurring.
- Varilux[®] Stylistic[™] design is available in Costa wrap frames for those patients with greater demand for a wider near field of vision in authentic Costa-branded sunwear.

LENS COLOR OPTIONS

BRIGHT LIGHT

BLUE MIRROR

10% LIGHT TRANSMISSION

Made for the open water. Encapsulated mirrors deliver maximum contrast and color in full sun while eliminating reflected glare

GREEN MIRROR

10% LIGHT TRANSMISSION

Encapsulated mirrors offer enhanced visual acuity for fishing inshore, flats, rivers and streams.

GRAY

12% LIGHT TRANSMISSION

Perfect all-around choice for sports on water and land. Maintains color saturation and natural contrast in medium to bright sun conditions.

SILVER COPPER MIRROR

12% LIGHT TRANSMISSION

Encapsulated mirrors optimize light transmission and enhance colors. Perfect for sight fishing or any outdoor activity with variable light.

COPPER

12% LIGHT TRANSMISSION

Made for sight fishing, driving and everyday activities. Cuts glare and enhances contrast and color, providing eye comfort in any conditions.

AMBER

12% LIGHT TRANSMISSION

Excellent all-around lens that delivers the brightest field of vision. Great choice for fishing, driving and activities where high contrast is needed.

SILVER SUNRISE MIRROR*

30% LIGHT TRANSMISSION

Extended wear lens. The perfect tool for dusk and dawn performance.

LOW LIGHT

*SILVER SUNRISE LENSES ARE NOT SUITABLE FOR DRIVING.
